

Coir Logo Mats

About Coir Logo Mats:

Coir or Coconut fibre is the original hard wearing material chosen for years to make long lasting doormats. It gives a traditional appearance, and is extremely effective at removing dirt, helping to protect your investment in your internal floor coverings. We also offer a Synthetic Coir alternative made from polypropylene which comes in 2 thicknesses and a range of colours.

When it features your company logo or crest a coir logo doormat is the best solution to create just the right impression for your customers and visitors.

When we make a Coir Logo Mats the design is inlaid into the coir for a very long lasting finish. We cut the design out in the appropriate coloured coir or synthetic coir and insert this into the back ground colour of the mat so the coloured fibres run throughout and the design will last for the lifetime of the mat.

Features
